

Silver Solution

DESCRIPTION

This Silver Solution pH Balanced Structured Silver Solution is the next generation in silver supplement technology. This solution is triple the strength of our normal solution. It contains 30ppm silver, and is pH balanced to optimize your body's absorption and increase potential benefits to your body systems*, all while leaving your body in it's naturally balanced state.

Silver has been used for centuries and **even recently by NASA** in their shuttle water purification systems, and handheld electronic device glass producers because of its antimicrobial properties. Other companies are catching on that silver not only works, it works great! So what sets This Silver Solution silver apart? Our superior silver is pH balanced for optimal health.

Having the right balance is key. And when it comes to our body's pH levels, it can have a dramatic impact on health! pH is a measure on a scale of 1 to 11 of how acidic (low number) or alkaline (high number) something is and our blood pH needs to maintain a slightly alkaline level (over 7) to keep us healthy. We help our bodies to maintain this pH balance by consuming more alkaline-forming products and foods and fewer acid-forming products and foods. Most all other silver solutions on the market are acidic while **This Silver Solution maintains a truly pH balanced approach.**

Now you can get all the great benefits of the immune support from silver while not disrupting your body's pH.

Therapeutic grade — Triple Strength.
